Evaluation

When I first got to Rose Bay, I walked around and helped find all the kids that were there for the awards. Then I went fishing with a group of kids. When I came back I walked out by the lake and picked up trash. We were out there for at least an hour. Then once we came back I had to wait until the Insect man came out. He came and he took us around and showed us about the Insects that are in the plants and where to look for them. Once we came back it was time for lunch. We all got together and had lunch. Some of us had to sit on the floor so the adults could sit at a table. During lunch Ms. Chapman passed out awards to everyone who participated to Rose Bay. Every student out there got an award. She even gave some to the adults that helped out. We cleaned are mess up and then it was time to go. Some others stayed out but I came back.
